**SPECIFIC CONSIDERATIONS**

1. See the Summer & Fall 2019 Schedule of Classes on myBama. You must be **organized** and have an outline of the courses that you want to take prior to your scheduled advising appointment. Once you decide on selected classes, pick two additional classes you could take, in case your selection is not available.
2. Courses in Nutrition, Physics and Chemistry are recommended.
3. Schedule all academic classes early in the morning. The majority of your clinical education experience will occur in the afternoon. Avoid scheduling classes during the 9-10 & 10-11 & 11-12 slots on WF. Clinical Skills Lab is open from 9-12 WF. It is very important that your schedule allow you to attend CSkills lab! Speak with your Fall 2019 Preceptor(s) about their projected schedule(s) so that your schedule will be as conflict-free as possible.
4. Review and complete all core curriculum requirements. (*2018-2019 Undergraduate Catalog – <https://catalog.ua.edu/undergraduate/about/academic-regulations/curriculum/core-curriculum-general-education-requirements/>*)
5. Specific athletic training classes offered in Interim & Summer 2019
  - ATR 453 – Applied Clinical & Research Skills (3) SUMMER I (2Ys)
